

Report from [Party name]

United Nations

Convention to Combat
Desertification

prais

[Date of submission]

Contents

I. Country Profile

II. Strategic objectives

- A. Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality
 - Indicator SO1-1: Trends in land cover
 - Indicator SO1-2: Trends in land productivity or functioning of the land
 - Indicator SO1-3: Trends in carbon stocks above and below ground
 - Sustainable Development Goal indicator 15.3.1: Proportion of land that is degraded over total land area
 - Voluntary targets
- B. Strategic objective 2: To improve the living conditions of affected populations
 - Indicator SO2-1: Trends in population living below the relative poverty line and/or income inequality in affected areas
 - Indicator SO2-2: Trends in access to safe drinking water in affected areas
 - Voluntary targets
- C. Strategic objective 3: To mitigate, adapt to, and manage the effects of drought in order to enhance resilience of vulnerable populations and ecosystems
 - Voluntary targets
- D. Strategic objective 4: To generate global benefits through effective implementation of the United Nations Convention to Combat Desertification
 - Indicator SO4-1: Trends in carbon stocks above and below ground
 - Indicator SO4-2: Trends in abundance and distribution of selected species
 - Voluntary targets
- E. Additional indicators for strategic objectives 1, 2 and 4
- F. Strategic objective 5: To mobilize substantial and additional financial and non-financial resources to support the implementation of the Convention by building effective partnerships at global and national level
 - Indicator SO5-1: Trends in international bilateral and multilateral official development assistance
 - Indicator SO5-2: Trends in domestic public resources
 - Indicator SO5-3: Trends in number of co-financing partners
 - Indicator SO5-4: Resources mobilized from innovative sources of finance, including from the private sector

II. Implementation framework

- A. Financial and non-Financial resources
- B. Policy and planning
- C. Action on the ground

Country Profile

Land area

Indicated the total land area, the area covered by water bodies and total country area:

Year	Total land area (km ²)	Water bodies (km ²)	Total country area (km ²)	Comments

Demographics

Estimates of the urban, rural and total population living in your country:

Year	Urban (thousands)	Rural (thousands)	Total (thousands)	Comments

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

S01-1

Trends in land cover

Land cover

Quantitative data

National level estimates of the distribution of the main land cover classes (in kilometres squared (km²)). Default data are derived from the  and they can be amended as appropriate.

Year	Land cover (km ²)					
	Tree-covered areas	Grassland	Cropland	Wetland	Artificial surfaces	Other areas
Net area change						

Land cover area change matrix (in squared kilometers).

Final class \ Initial Class	Tree-covered areas	Grassland	Cropland	Wetland	Artificial surfaces	Other land
Tree-covered areas						
Grassland						
Cropland						
Wetland						
Artificial surfaces						
Other land						

Please answer the following question if you have edited or replaced the default data using other data sources:

Sources of information

Provide the source of data.

[Click here to enter text.](#)

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

Qualitative assessment

Interpretation of the indicator

Based on the quantitative data, describe the most significant negative or positive land cover changes as well as their direct and/or indirect drivers:

Land conversion		Net area change (Km ²)	Driver(s)		Description of changes	Comments
From	To 		Direct  (Choose one or more items)	Indirect  (Choose one or more items)		

Hotspots/brightspots

Indicate where in your country the most significant hotspots/brightspots related to land cover are located:

Hotspots/brightspots	Location	Area (Km ²)	Comments

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

S01-2

Trends in land productivity or functioning of the land

Land productivity dynamics

Quantitative data

National level estimates of land productivity dynamics within each land cover type: area covered by each class of land productivity dynamics (in km²).

Default data are derived from the  they can be amended as appropriate.

Land cover class	Net land productivity dynamics (2000–2010) (km ²)					
	Declining	Moderate decline	Stressed	Stable	Increasing	No data
Tree-covered areas						
Grassland						
Cropland						
Wetland						
Artificial surfaces						
Other land						

Estimates of land productivity dynamics for areas where a land conversion to a new land cover type has taken place (in km²)

Land conversion		Net area change (Km ²)	Net land productivity dynamics (2000–2010)(km ²)				
From	To 		Declining	Moderate decline	Stressed	Stable	Increasing

Please answer the following questions if you have edited or replaced the default data using other data sources:

Other metrics

If your country uses a different metric to assess land productivity (e.g. Normalized Difference Vegetation Index (NDVI), Enhanced vegetation Index (EVI)), specify which metric your country uses and provide the data here.

[Click here to enter text.](#)

Sources of information

Provide the source of data.

[Click here to enter text.](#)

Qualitative assessment

Interpretation of the indicator

Based on the quantitative data, describe the most significant negative or positive changes in land productivity as well as their direct and/or indirect drivers.

Land cover	Area	Land	Driver(s)	Comments

Strategic objectives

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

class / Land conversion	(Km ²)	productivity dynamics 	Direct  (Choose one or more items)	Indirect  (Choose one or more items)

Hotspots/brightspots

Indicate where in your country the most significant hotspots/brightspots related to land productivity are located.

Hotspots/brightspots	Location	Area (Km ²)	Comments

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal

[Click here to enter text.](#)

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

S01-3

Trends in carbon stocks above and below ground

Soil organic carbon stock

Quantitative data

National level estimates of the soil organic carbon (SOC) stock in topsoil (0-30 cm) within each land cover type (in tonnes per hectare).

Default data are derived from the  and they can be amended as appropriate.

Year	Soil organic carbon stock in topsoil (t/ha)					
	Tree-covered areas	Grassland	Cropland	Wetland	Artificial surfaces	Other land

Estimates of change of organic carbon stock in soil due to land conversion to a new land cover type

Land conversion		Net area change (Km ²)	Soil organic carbon (SOC) stock change (2000–2010)				
From	To		Initial SOC stock (t/ha)	Final SOC stock (t/ha)	Initial SOC stock total (t)	Final SOC stock total (t)	SOC stock change (t)

Please answer the following question if you have edited or replaced the default data using other data sources:

Sources of information

Provide the source of data.

[Click here to enter text.](#)

Qualitative assessment

Interpretation of the indicator

Based on the quantitative data, describe the most significant negative or positive changes in organic carbon stock in soil as well as their direct and/or indirect drivers.

Land cover class / Land conversion	Area (Km ²)	Soil organic carbon stock change (t/ha)	Driver(s)		Comments
			Direct (Choose one or more items) 	Indirect (Choose one or more items) 	

Hotspots/brightspots

Indicate where in your country the most significant hotspots/brightspots related to soil organic carbon stock are located.

Strategic objectives

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

Hotspots/brightspots	Location	Area (Km ²)	Comments

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

S01

Proportion of land that is degraded over total land area (Sustainable Development Goal indicator 15.3.1)

Proportion of land that is degraded

Indicate the total area of land that is degraded (in km²), and the proportion of degraded land relative to the total land area (defined as the total surface area of a country less the area covered by inland waters, like major rivers and lakes), and the year.

Total area of degraded land (Km ²)	Proportion of degraded land	Year

Method

Did you use the 3 sub-indicators (i.e. land cover, land productivity dynamics and soil organic carbon stock) to compute the proportion of land that is degraded?

- yes
- only 2
- only 1
- no

Did you apply the One Out, All Out principle to compute the proportion of land that is degraded?

- yes
- no

If no, indicate the method used to assess the proportion of land that is degraded

[Click here to enter text.](#)

Level of confidence

Indicate your country's level of confidence in the assessment of the proportion of land that is degraded:

- High (based on comprehensive evidence)
- Medium (based on partial evidence)
- Low (based on limited evidence)

Describe why the assessment has been given the level of confidence selected above:

[Click here to enter text.](#)

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

Strategic objective 1: To improve the condition of affected ecosystems, combat desertification/land degradation, promote sustainable land management and contribute to land degradation neutrality

S01 Voluntary targets

Land degradation neutrality targets

Has your country set any land degradation neutrality target(s)? Yes No

List any LDN target your country has set, and indicate the expected year of achievement and level of application (e.g. national level, subnational level, specific targets).

Target	Year	Level of application 

Is your country planning to set any LDN target(s)? Yes No

Other targets

List any other target relevant to strategic objective 1 that your country has set, and indicate the expected year of achievement and level of application (e.g. national, subnational):

Target	Year	Level of application 

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

Strategic objective 2: To improve the living conditions of affected populations

S02-1

Trends in population living below the relative poverty line and/or income inequality in affected areas

Relevant metric

Choose the metric relevant to your country:

- Proportion of population below the international poverty line
- Income inequality

Proportion of population below the international poverty line

Quantitative data

Estimates of the proportion of population below the international poverty line (percentage)
The 'international poverty line' is currently set at USD 1.90 a day based on 2011 purchasing power parity.

Year	Proportion of population below the international poverty line

Sources of information

Provide the source of data.

[Click here to enter text.](#)

Income inequality

Quantitative data

Estimate of income inequality (Gini index).

Year	Income inequality (Gini Index)

Sources of information

Provide the source of data.

[Click here to enter text.](#)

Qualitative assessment

Interpretation of the indicator

Based on the quantitative data, describe the most significant negative or positive changes in the indicator as well as their direct and/or indirect drivers.

Change in the indicator	Driver(s)	Comments

Strategic objective 2: To improve the living conditions of affected populations

	Direct (Choose one or more items)		Indirect (Choose one or more items)		

Hotspots/brightspots

If disaggregated data (e.g. per administrative division, urban vs. rural, affected areas etc.) are available in your country, indicate where the most significant hotspots/brightspots related to this indicator are located.

Hotspots/brightspots	Location	Comments

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

S02-2

Trends in access to safe drinking water in affected areas

Proportion of population using safely managed drinking water services

Quantitative data

Estimates of the proportion of population using safely managed drinking water services.

Year	Urban (Percent)	Rural (Percent)	Total (Percent)

Sources of information

Provide the source of data.

[Click here to enter text.](#)

Qualitative assessment

Interpretation of the indicator

Based on the quantitative data, describe the most significant negative or positive changes in the indicator as well as their direct and/or indirect drivers.

Change in the indicator 	Driver(s)		Comments
	Direct  (Choose one or more items)	Indirect  (Choose one or more items)	

Hotspots/brightspots

If disaggregated data (e.g. per administrative division, urban vs. rural, affected areas etc.) are available in your country, indicate where the most significant hotspots/brightspots related to this indicator are located.

Hotspots/brightspots	Location	Comments

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

S02

Voluntary targets

Targets

List any target relevant to strategic objective 2 that your country has set, and indicate the expected year of achievement and level of application (e.g. national, subnational):

Target	Year	Level of application	

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

Strategic objective 3: To mitigate, adapt to, and manage the effects of drought in order to enhance resilience of vulnerable populations and ecosystems

S0 3

Indicators

Nationally relevant indicators

Which indicators is your country using to measure progress towards strategic objective 3, related targets and/or specific expected impacts?

Indicator	Qualitative assessment 	Comments

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal

[Click here to enter text.](#)

S03

Voluntary targets

Targets

List any target relevant to strategic objective 3 that your country has set and indicate the expected year of achievement and level of application (e.g. national, subnational).

Target	Year	Level of application 

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

Strategic objective 4: To generate global environmental benefits through effective implementation of the United Nations Convention to Combat Desertification

S04-1

Trends in carbon stocks above and below ground

Trends in carbon stock above and below ground is a multi-purpose indicator used to measure progress towards both strategic objectives 1 and 4. Quantitative data and a qualitative assessment of trends in this indicator are reported under strategic objective 1, progress indicator S01-3.

S04-2

Trends in abundance and distribution of selected species

Quantitative data

Red List Index of species survival

Year	Red List Index

Sources of information

Provide the source of data.

[Click here to enter text.](#)

Qualitative assessment

Interpretation of the indicator

Based on the quantitative data, describe the most significant negative or positive changes in the indicator as well as their direct and/or indirect drivers:

Change in the indicator 	Driver(s)		Comments 
	Direct (Choose one or more items)	Indirect (Choose one or more items)	

Hotspots/brightspots

If disaggregated data (e.g. by ecosystems, habitats, and other political and geographic divisions) are available in your country, indicate where the most significant hotspots/brightspots related to this indicator are located.

Hotspots/brightspots	Location	Comments

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

Strategic objective 4: To generate global environmental benefits through effective implementation of the United Nations Convention to Combat Desertification

S04

Voluntary targets

Targets

List any target relevant to strategic objective 4 that your country has set and indicate the expected year of achievement and level of application (e.g. national, subnational).

Target	Year	Level of application

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

SO1, 2 and 4

Additional indicators

Nationally relevant indicators

Which additional indicators is your country using to measure progress towards strategic objectives 1, 2 and 4 and related targets?

Indicator	Relevant strategic objective or target	 Qualitative assessment	 Comments

Complementary information

Provide any complementary information you deem relevant and upload any complementary data/document into the space provided on the PRAIS portal.

[Click here to enter text.](#)

Strategic objective 5: To mobilize substantial and additional financial and non-financial resources to support the implementation of the Convention by building effective partnerships at global and national level

S05-1

Trends in International Bilateral and Multilateral Official Development Assistance

Quantitative data

Total amount of bilateral official development assistance (ODA) committed for activities relevant to the implementation of the Convention over the previous five years.

Data derived from information reported to the Organization for Economic Co-operation and Development (OECD) Development Assistance Committee (DAC), based on the Rio marker classification for desertification; they can be amended as appropriate.

Year	Total official development assistance committed for activities relevant to the implementation of the Convention
2012	
2013	
2014	
2015	
2016	

Sources of information

If you have used other global/regional data sources or national data, please provide the source of data.

[Click here to enter text.](#)

Qualitative assessment

Complementary information

Provide any complementary information you deem relevant, including trends emerging from the data as indicated above and how they relate to financing the implementation of the Convention, and the types of projects and/or regions or countries on which your country has focused to the greatest extent.

[Click here to enter text.](#)

Strategic objective 5: To mobilize substantial and additional financial and non-financial resources to support the implementation of the Convention by building effective partnerships at global and national level

S05-2

Trends in domestic public resources

Qualitative assessment

Trends in amount of domestic desertification financing

Choose the option representing the trend in the total amount of financing relevant for implementation of the Convention committed at the national level during the five-year period from 2012 to 2016

Trends in national-level financing for activities relevant to the implementation of the Convention		
Up	↑	<input type="checkbox"/>
Stable	↔	<input type="checkbox"/>
Down	↓	<input type="checkbox"/>
Unknown	~	<input type="checkbox"/>

Sources of information

Provide the source of trend information.

[Click here to enter text.](#)

Complementary information

Provide any complementary information you deem relevant, including trends emerging from the data as indicated above and how they relate to financing the implementation of the Convention, and the types of projects and/or regions on which national-level financing has focused to the greatest extent.

[Click here to enter text.](#)

Strategic objective 5: To mobilize substantial and additional financial and non-financial resources to support the implementation of the Convention by building effective partnerships at global and national level

S05-3

Trends in number of co-financing partners

Qualitative assessment

Trends in number of co-financing partners

Choose the option representing the trend in the number of co-financing partners for activities relevant to the implementation of the Convention between 2012 and 2016

Number of co-financing partners for activities relevant to the implementation of the Convention		
Up	↑	<input type="checkbox"/>
Stable	↔	<input type="checkbox"/>
Down	↓	<input type="checkbox"/>
Unknown	~	<input type="checkbox"/>

Sources of information

Provide the source of trend information.

[Click here to enter text.](#)

Complementary information

Provide any complementary information you deem relevant, including trends emerging from the data as indicated above and how they relate to financing the implementation of the Convention, and the types of projects and/or regions or countries on which co-financing partners have focused to the greatest extent.

[Click here to enter text.](#)

Strategic objective 5: To mobilize substantial and additional financial and non-financial resources to support the implementation of the Convention by building effective partnerships at global and national level

S05-4

Resources mobilized from innovative sources of finance, including from the private sector

Qualitative assessment

Trends in resources mobilized from innovative sources of finance

Choose the option representing the trend in the resources mobilized from innovative sources of finance, including from the private sector, for activities relevant to the implementation of the Convention for the four-year period between 2012 and 2016

Amount of resources mobilized from innovative sources of finance, including from the private sector for activities relevant to the implementation of the Convention		
Up	↑	<input type="checkbox"/>
Stable	↔	<input type="checkbox"/>
Down	↓	<input type="checkbox"/>
Unknown	~	<input type="checkbox"/>

Sources of information

Provide the source of trend information.

[Click here to enter text.](#)

Complementary information

Provide any complementary information you deem relevant, including trends emerging from the data as indicated above and how they relate to financing the implementation of the Convention, and types of projects and/or regions or countries on which innovative sources of finance have focused to the greatest extent.

[Click here to enter text.](#)

Increasing mobilization of financial and non-financial resources for the implementation of the Convention from international and domestic, public and private sources as well as from local communities, including non-traditional funding sources, and climate finance.

Increasing mobilization of resources

Would you like to share an experience on how your country has increased the mobilization of resources?

Yes

No

If yes, was this

Financial resources

Non-financial resources

What sources were mobilized?

International

Domestic

Public

Private

Local communities

Non-traditional funding sources

Climate finance

Other _____

Narrative

Provide any complementary information you deem relevant.

[Click here to enter text.](#)

Support

Has your country supported other countries in the mobilization of financial and non-financial resources for the implementation of the Convention?

Yes

No

Narrative

If yes, describe your experience below.

[Click here to enter text.](#)

Taking advantage of the opportunity of using land degradation neutrality as a framework to enhance the coherence, effectiveness and multiple benefits of investments.

Using LDN as a framework to increase investment

Would you like to share how your country has taken advantage of the LDN concept to enhance the coherence, effectiveness and multiple benefits of investments?

Yes

No

Narrative

If yes, describe your experience below.

[Click here to enter text.](#)

Improving the use of existing and/or innovative financial processes and institutions (such as the Global Environment Facility (GEF) or other newer funds)

Improving existing and/or innovative financial processes and institutions

Would you like to share an experience on how your country has improved the use of existing and/or innovative financial processes and institutions?

Yes

No

If yes, is your experience about using

- Existing financial processes
- Innovative financial processes
- The GEF
- Other funds

Narrative

Provide any complementary information you deem relevant.

[Click here to enter text.](#)

Support

Has your country supported other countries in the improvement of existing or innovative financial processes and institutions?

Yes

No

Narrative

If yes, describe your experience below.

[Click here to enter text.](#)

Developing, implementing, revising and regularly monitoring, as appropriate, national, subregional and regional action programmes and/or plans as effective tools for UNCCD implementation

Action programmes

Would you like to share an experience on how your country/subregion/region/institution has developed or helped develop, implement, revise or regularly monitor action programmes?

Yes

No

If yes, at which level has this happened or is it happening

National level

Subregional level 

Regional level 

Is your experience about

Implementing action programmes

Revising action programmes

Regularly monitoring action programmes

Other

Narrative

Provide any complementary information you deem relevant.

[Click here to enter text.](#)

Establishing policies and enabling environments for promoting and implementing solutions to combat desertification/land degradation and mitigate the effects of drought including prevention, relief and recovery

Synergies

	Yes	No
Would you like to share an experience on how your country institution has established or helped establish policies and enabling environments to promote and/or implement solutions to combat desertification/land degradation and mitigate the effects of drought?	<input type="checkbox"/>	<input type="checkbox"/>

If yes, those policies and enabling environments aimed at:

- Promoting solutions to combat DLDD
- Implementing solutions to combat DLDD

Is your experience about

- Prevention of the effects of DLDD
- Relief efforts after DLDD has caused environmental and/or socio-economic stress on ecosystems and/or populations
- Recovery efforts after DLDD has caused environmental and/or socio-economic stress on ecosystems and/or populations
- Engagement of women in decision-making and implementation and promotion of their land rights
- Other:

Narrative

Provide any complementary information you deem relevant.

[Click here to enter text.](#)

Support

	Yes	No
Has your country supported other countries in establishing policies and enabling environments for promoting and implementing solutions to combat desertification/land degradation and mitigate the effects of drought including prevention, relief and recovery?	<input type="checkbox"/>	<input type="checkbox"/>

If yes, describe your experience below.

Narrative

[Click here to enter text.](#)

Leveraging synergies and integrating DLDD into national plans related to the multilateral environmental agreements (MEAs), in particular the other Rio conventions and other international commitments, as appropriate, within their respective mandates, optimizing efficacy and eliminating duplication of efforts.

Synergies

Would you like to share an experience on how your country has leveraged synergies and integrated DLDD into national plans related to other MEAs, in particular the other Rio conventions and other international commitments?

Yes

No

If yes, the actions have aimed at:

- Leveraging DLDD with other national plans related to the other Rio conventions
- Integrating DLDD into national plans
- Leveraging synergies with other strategies to combat DLDD
- Integrating DLDD into other international commitments
- Other:

[Click here to enter text.](#)

Narrative

Provide any complementary information you deem relevant.

[Click here to enter text.](#)

Mainstreaming DLDD as appropriate into economic, environmental and social policies, with a view to increasing the impact and effectiveness of the implementation of the Convention

Synergies

Would you like to share an experience on how your country is mainstreaming DLDD in economic, environmental and social policies, with a view to increasing the impact and effectiveness of the implementation of the Convention

Yes

No

If yes, DLDD was mainstreamed into:

Economic policies

Environmental policies

Social policies

Other:

Narrative

Provide any complementary information you deem relevant

[Click here to enter text.](#)

Establishing national policies, measures and governance for drought preparedness and management, including drought contingency plans according to the mandate of the Convention.

Synergies

Would you like to share an experience on how your country established/is establishing national policies, measures and governance for drought preparedness and management including drought contingency plans?

Yes

No

1- If yes, does your country have a drought contingency plan?

Yes

No

2- If yes, is your country establishing :

National policies for drought preparedness and management

Measures for drought preparedness and management

Narrative

Provide any complementary information you deem relevant

[Click here to enter text.](#)

Support

Has your country supported other countries in establishing policies, measures and governance for drought preparedness and management, including drought contingency plans in accordance with the mandate of the Convention?

Yes

No

Narrative

If yes, describe your experience below.

[Click here to enter text.](#)

Implementing sustainable land management practices

Synergies

Would like to share experiences on how your country is implementing sustainable land management (SLM) practices to address DLDD?

Yes

No

If yes, what types of SLM practices are being implemented?

Narrative

Provide any complementary information you deem relevant

[Click here to enter text.](#)

Support

Has your country supported other countries in the implementation of SLM practices?

Yes

No

Narrative

If yes, describe your experience below.

[Click here to enter text.](#)

Implementing restoration and rehabilitation practices in order to assist with the recovery of ecosystem functions and services

Synergies

Would like to share experiences on how your country is involved in restoration and rehabilitation practices in order to assist with the recovery of ecosystem functions and services?

Yes

No

If yes, what types of practices are being implemented?

[Click here to enter text.](#)

At what level does your country implement the restoration and rehabilitation practices?

- a. National level
- b. Subnational level
- c. Other (please specify: _____)

Narrative

Provide any complementary information you deem relevant

[Click here to enter text.](#)

Support

Has your country supported other countries in the restoration and rehabilitation practices in order to assist with the recovery of ecosystem functions and services?

Yes

No

Narrative

If yes, describe your experience below.

[Click here to enter text.](#)

Promoting alternative livelihoods

Synergies

Does your country promote alternative livelihoods practice in the context of DLDD?

Yes

No

1. If yes, could you list some practices implemented at your country level to promote alternative livelihoods?

[Click here to enter text.](#)

2. Would you like to share experiences in engaging women and youth in promoting alternative livelihoods?

Narrative

Provide any complementary information you deem relevant

[Click here to enter text.](#)

Establishing systems for sharing information and knowledge and facilitating networking on best practices and approaches to drought management

Synergies

Has your country established systems for sharing information and knowledge and facilitating networking on best practices and approaches to drought management?

Yes No

If yes, would you like to share/list the established systems available in your country for sharing information and knowledge and facilitating networking on best practices and approaches to drought management?

Yes

No

[Click here to enter text.](#)

Would you like to share experiences on programmes/activities that promote women's access to knowledge and technology?

Yes

No

Narrative

Provide any complementary information you deem relevant

[Click here to enter text.](#)
